***“Research Methodology”***  
(from 29<sup>th</sup> October, 2018 to 15<sup>th</sup> November, 2018)

**COURSE OUTCOME**

Students who complete this course will be able to understand and comprehend the basics in research methodology and applying them in research/ project work. It will provide a hands-on experience to the students to carry out research work in different subjects like Mathematics, Geography, Sociology, Philosophy, Bio Sciences, Physics, Chemistry, Linguistics etc. This course will help them to select an appropriate research design. It will also be beneficial for identifying the sources of research problems. Students will know about the sources and methods of literature review and they will be able to apply various methods of literature review for collecting primary and secondary data in their research work. With the help of this course, students will be able to take up and implement a research project/ study. The course will also enable them to collect the data, edit it properly and analyse it accordingly. The students will develop skills in qualitative and quantitative data analysis and presentation. Students will be able to demonstrate the ability to choose methods appropriate to research objectives. This course provides students with knowledge, general competence, and analytical skills in Research Methodology. The course will help the students to understand the ethical issues related to Research and Publication. The students will get an idea about the necessity and importance of references and bibliography in research report writing. Completion of this course will be helpful to the students for building modeling, developing hypothesis and devising new algorithms. Thus, it will facilitate students' prosperity in higher education.

**MĪMĀMSĀ THEORY OF INFERENCE WITH SPECIAL  
REFERENCE TO MĀNAMEYODAYA**

Mīmāṃsā Darśana particularly known as Purva Mīmāṃsā Darśana is one of the six orthodox schools of Indian philosophy. This school primarily focus on the proper understanding and interpretation of Vedic texts but the logic of this school is also well developed. But the cultivation of Mīmāṃsā Logic is inconsiderable whereas Mīmāṃsā Logic plays a crucial role in analyzing the Vedic texts and understanding the proper significance of Vedic teachings. For this reason the add-on-course aims to build-up the proficiency of the students of philosophy in the field of Mīmāṃsā Logic or the Mīmāṃsā theory of inference. The outcomes of the course may be specified following way:

- ❖ Students will comprehend the principles and process of inference in Mīmāṃsā philosophy.
- ❖ Students may apply their knowledge to analyse or interpret Vedic texts.
- ❖ This knowledge may be helpful to understand the actual significance of Vedic teachings.
- ❖ Students will be able to compare Mīmāṃsā theory of inference with the Nyāya theory of inference, the most popular and well cultivated Indian logic or with the logic of any other schools of Indian philosophy.
- ❖ This course may be helpful for the students preparing for subject best professional examinations like NET, SET etc.

In summary, the Mīmāṃsā theory of inference emphasizes a systematic approach to reasoning, with a focus on deriving conclusions based on established principles and examples. It is integral to understanding Vedic texts and rituals, ensuring that interpretations are logically sound.

## BENEFITS OF THE COURSE

## NAYAGRAM PRM GOVT. COLLEGE

This college situated in rural area of West Bengal, Jungle Mahal and most of students come from poor family. Apart from the regular classes Department of Mathematic offers an Add-on-Course MATHAOC-2 which shall be conducted on summer recess. This course shall be conducted by the teachers of mathematics department to help students for success in various competitive examinations.

### ABOUT THE PROGRAMME

Vedic mathematics is an ancient technique consisting of sixteen sutras and sixteen sub-sutras. It simplifies not only the fundamental arithmetic operations, such as multiplication and division, but also more advanced concepts such as simultaneous equations, quadratic equations, the factorization of cubic equations, and so on. Vedic mathematical technique is rapidly emerging as a tool for students appearing in various competitive examinations, where speed and accuracy play a vital role.

This programme is designed to introduce with the concepts of Vedic Mathematics which will help them to do complex calculations within the time of few seconds.

**ETHICS IN EVERYDAY LIFE**

Simply the outcome of the add-on-course entitled “**Ethics in Everyday Life**” is to help students to develop a deeper understanding of ethical principles or theories and their practical applications through which they can apply their ethical knowledge in their day-to-day activities and interactions in various personal and professional contexts. We may specify the outcomes of the course following way:

- Students will comprehend the major ethical theories of Indian and Western ethics.
- Students will able to apply the ethical principles in their everyday life.
- The ability of the students to analysing ethical dilemmas will be enhanced.
- The skills of the students to constructing well-reasoned arguments for justifying ethical decisions based on principles and theories will be improved.
- Students will gain insights into ethical standards and practices relevant to their field of study or profession.

Overall, the course aims to empower students to navigate moral complexities and make informed, ethically sound decisions in their daily lives.

**COURSE CONTENT**

1. Statistical data: Concept and sources of statistical data, Concept of statistical analysis
2. Concept and Measures of Central Tendency: Mean, Median and Mode
3. Concept and Measures of Dispersion: Absolute Dispersion (Range, Quartile Deviation, Mean Deviation, Variance, Standard Deviation) and Relative Dispersion (Coefficient of Variation)
4. Nature and trends of distribution of data: Moments, Skewness and Kurtosis
5. Concept and Measures of Relationship: Types of Co-relation and Regression
6. Multivariate Analysis: Factor Analysis and Principal Component Analysis
7. Measures of Inequality: Lorenz Curve and Gini-Coefficient; Location Quotient
8. Probability and Probability Distributions: Binomial, Poisson and Gaussian distributions. Addition and Multiplication rule of Probability.
9. Theory of Sampling: Samples and Populations, Advantages and Disadvantages of Sampling, Types of Sampling (Probability and Non-probability sampling)
10. Hypothesis Testing: Concept and types of hypotheses, Parametric and non-parametric data and tests, Testing of Hypothesis (Chi-square test and Student t test)

***“Statistical Analysis of Data”***  
(from 15<sup>th</sup> June, 2019 to 27<sup>th</sup> June, 2019)

**OUTCOME OF THE COURSE**

- The course will help the students to organize, manage and present the statistical data collected from different sources using various graphical and statistical methods.
- Analyze statistical data using measures of central tendency, relative and absolute measures of dispersion and location. It will also help the students to understand the nature of distribution of data.
- Calculate and interpret the correlation between two variables. Calculate the simple linear regression equation for a set of data. Applying the principles of linear regression and correlation, including least square method, predicting a particular value of Y for a given value of X and significance of the correlation coefficient.
- Students will be able to understand and measure the inequality in the distribution of statistical data applying graphical and mathematical techniques.
- Use the basic probability rules, including additive and multiplicative laws, using the terms, independent and mutually exclusive events. Derive the probability density function of transformation of random variables.
- Use discrete and continuous probability distributions, including requirements, mean and variance, and making decisions. Use of Binomial and Poisson to solve statistical problems. Use the normal probability distribution including standard normal curve calculations of appropriate areas.
- It will help the students to apply various sampling techniques for collection of data required in their study or research.
- Students will be able to draw reliable conclusions using the statistical decisions by hypothesis testing techniques.

## 1. BASIC DETAILS OF THE 30 HOURS ADD-ON COURSE

SL. No	TITLE	CONTENT
1	Course Title	<b>THOUGHTS AND ASPECTS OF INDIAN HISTORY</b>
2	Context	Indian history is a narrative of unparalleled richness, spanning epochs from the ancient Indus Valley Civilization to the vibrant tapestry of modern India. It unfolds through the interplay of dynasties, religions, philosophies, and cultural exchanges, reflecting the subcontinent's enduring spirit of innovation and resilience. From the profound insights of ancient scriptures to the architectural marvels of medieval empires, and the transformative struggles for independence in the 20th century, Indian history resonates with diverse voices and visions. It invites exploration into its deep-rooted traditions, philosophical inquiries, and the ongoing quest for identity in a rapidly changing global landscape.
3	Pre-requisite	All Under-Graduate students of History
4	Course Objective	The objective of this course is to explore the dynamic tapestry of Indian history, spanning ancient civilizations to modern-day India. Through critical analysis and examination of key historical events, cultural developments, and philosophical insights, students will gain a comprehensive understanding of how India's diverse societies, religions, and intellectual traditions have shaped its identity. By delving into the nuances of ancient empires, medieval dynamics, colonial encounters, and the quest for independence, this course aims to cultivate a deeper appreciation for the complexities and enduring legacies of Indian history. Students will be encouraged to engage critically with primary sources, scholarly interpretations, and contemporary debates to develop a nuanced perspective on India's historical evolution and its relevance in a global context.

## V. EVALUATION PROCESS FOR THE ADD-ON COURSE

The basic philosophy behind the Evaluation process for this 30 Hours Add-on course is to objectively judge whether the participants (students) have been able to understand of the diverse intellectual, cultural, and political dimensions that have shaped India's historical trajectory. They will gain insights into the philosophical foundations, socio-cultural dynamics, and pivotal historical events that continue to influence contemporary India. Through critical analysis of primary sources and scholarly interpretations, students will emerge with a nuanced perspective on how ideas and historical developments interplay to define India's past and present identity on the global stage. the Philosophy of

## **COURSE CONTENT [ MATHAOC-2]**

**All classes will be taken place at Mathematics Laboratory at 11:00 am to 1:15 pm**

### **Day-1 (27/09/2022)**

1. Computation of whole numbers [PG]
2. Decimals, Fractions [BM]

### **Day-2 (28/09/2022)**

1. Relationships between numbers [PG]
2. Profit and Loss, Discount [PG]

### **Day-3 (29/09/2022)**

1. Partnership Business [PG]
2. Mixture and Alligation [BM]

### **Day-4 (30/09/2022)**

1. Time and distance [BM]
2. Time & Work [BM]

### **Day-5 (11/10/2022)**

1. Ratio & Proportion [BM]
2. Averages [PG]

### **Day-6 (12/10/2022)**

1. Percentage, Interest [PG]
2. Basic algebraic identities of School Algebra & Elementary surds, Square roots [BM]

### **Day-7 (13/10/2022)**

1. Graphs of Linear Equations [BM]
2. Triangle and its various kinds of centres [PG]

**Day-8 (14/10/2022)**

1. Congruence and similarity of triangles [PG]
2. Circle and its chords, tangents, angles subtended by chords of a circle, common tangents to two or more circles [BM]

**Day-9 (17/10/2022)**

1. Quadrilaterals [BM]
2. Regular Polygons [BM]

**Day-10 (18/10/2022)**

1. Right Prism [PG]
2. Right Circular Cone [PG]

**Day-11 (19/10/2022)**

1. Right Circular Cylinder [BM]
2. Sphere [PG]

**Day-12 (20/10/2022)**

1. Heights and Distances [BM]
2. Histogram [BM]

## NAYAGRAM PRM GOVT. COLLEGE

This college situated in rural area of West Bengal, Jungle Mahal and most of students come from poor family. Apart from the regular classes Department of Mathematic offers an Add-on-Course MATHAOC-2 which shall be conducted on summer recess. This course shall be conducted by the teachers of mathematics department to help students for success in various competitive examinations.

### ABOUT THE PROGRAMME

**Aim:** Since our students study in arts subject so there need a practice of basic mathematics for cracking of the various competitive examinations. After completion of this course they acquired knowledge of basic mathematics.

**OBJECTIVE:** To provide a general concept about the 12<sup>th</sup> standard mathematics, which is useful for various types of competitive examinations.

### MODULES

- Computation of whole numbers
- Decimals, Fractions
- Relationships between numbers
- Profit and Loss, Discount
- Partnership Business

**Syllabus for Add-On course entitled "USEAGES OF MS OFFICE AND INTERNET FOR SOCIAL SCIENCES"**

Here's the syllabus for an Add-On course titled "Usages of MS Office and Internet for Social Sciences." This course aims to equip students with practical skills in using Microsoft Office tools and the Internet to support their studies and research in the social sciences.

**Course Title:** Usages of MS Office and Internet for Social Sciences

**Course Duration:** 30 Hours

**Course Objectives:**

- To familiarize students with the basic and advanced features of MS Office tools.
- To enable students to use the Internet effectively for research and academic purposes.
- To develop students' skills in creating and managing documents, presentations, and data.
- To enhance students' ability to use online resources for social science research.

**Course Outline:**

**Topic-1: Introduction to MS Word**

- Overview of MS Word interface and features
- Creating, formatting, and editing documents
- Using styles, themes, and templates
- Inserting tables, charts, and images
- Track changes and comments for collaboration
- References and citations management

**Topic-2: Advanced MS Word Techniques**

- Creating complex documents: reports, theses, and dissertations
- Using advanced formatting: section breaks, headers, footers
- Creating and managing table of contents, indexes, and bibliographies
- Mail merge for letters and labels
- Tips and tricks for efficient document management

**Topic-3: Introduction to MS Excel**

- Overview of MS Excel interface and features
- Creating and formatting spreadsheets
- Basic formulas and functions
- Data visualization: charts and graphs
- Sorting, filtering, and pivot tables
- Data validation and conditional formatting

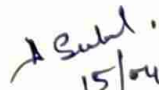

**Topic-4: Advanced MS Excel Techniques**

- Advanced formulas and functions
- Data analysis tools: Solver, Data Analysis Toolpak
- Macros and VBA for automation
- Linking and embedding data from other sources
- Creating dashboards and reports

**Topic-5: Introduction to MS PowerPoint**

- Overview of MS PowerPoint interface and features
- Creating and designing presentations

**Course Outcome of Add-On course entitled "USAGES OF MS OFFICE AND INTERNET FOR SOCIAL SCIENCES"**

**Course Objectives:**

- To familiarize students with the basic and advanced features of MS Office tools.
- To enable students to use the Internet effectively for research and academic purposes.
- To develop students' skills in creating and managing documents, presentations, and data.
- To enhance students' ability to use online resources for social science research.

**Course Objectives and Outcomes: "Usage of MS Office and Internet for Social Sciences"**

**1. Proficiency in MS Office Applications:**

- To Gain comprehensive knowledge of MS Word for document creation, formatting, and editing.
- To Develop skills in MS Excel for data analysis, including the use of formulas, functions, and data visualization tools.
- To Learn to create impactful presentations using MS PowerPoint, incorporating multimedia elements to enhance communication.

**2. Data Management and Analysis:**

- To Understand the principles of data management and organization using MS Excel.
- To Perform basic statistical analysis relevant to social sciences.
- To Create and interpret charts, graphs, and tables to present data effectively.

**3. Internet Research Skills:**

- To Learn effective online research techniques, including advanced search strategies and evaluating the credibility of sources.
- To Understand how to access and utilize online databases and academic journals relevant to social sciences.
- To Gain familiarity with various online tools and resources that can aid in research and data collection.

**4. Effective Communication:**

- To Use MS Office tools to collaborate with peers, sharing and co-editing documents and presentations.

**5. Ethical and Legal Considerations:**

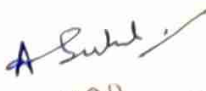

- To Understand the ethical and legal implications of using internet resources and handling data in social sciences.
- To Learn about data privacy, intellectual property rights, and proper citation practices.

**6. Practical Application:**

- To Apply learned skills to real-world social science research projects.
- To Utilize MS Office and internet tools to solve practical problems, enhancing overall academic and professional efficiency.

In summary, in today's digital age, proficiency in Microsoft Office and effective internet usage are essential skills for social science professionals. This course provides comprehensive training on using MS Office tools (Word, Excel, PowerPoint) and the internet to enhance academic research and productivity. This course aims to equip students with essential digital literacy skills, enabling them to leverage technology effectively in their social science studies and research.

**“Public Policy in India: Current Trends & Dimensions”**

10.05.2023 – 17.05.2023

**COURSE OUT – COME:**

**Topic 1: Introductory Lecture on Public Policy: Meaning, Nature & Significance of Public Policy in Administration:** Public Policy is an emerging area of study in Political Science and forms an integral part of the undergraduate and post – graduate syllabi designed for students of Political Science under NEP, 2020. This lecture mainly explained to students the meaning of Public Policy and also how it plays a very significant role in enhancing the quality, efficacy and efficiency of administration and governance. It also highlights why governments are paying increasing attention to improving the designing and implementation of Public Policy in recent times.

**Topic 2: Models of Public Policy, Part I:** In this lecture the most commonly used models of Public Policy were discussed in detail. In the first session the following models were discussed: Institutional model, Rational Model, Incremental Model, Normative Optimal Model were explained to students.

**Topic 3: Models of Public Policy, Part II:** This lecture was a continuation of the previous lecture. It explained in details the remaining models of Public Policy framing: Normative Optimal Model, Mixed Scanning Model, Systems Analysis Model and Process Model. Both these lectures were extremely important as they will help students to understand how governments frame different policies to meet different kinds of exigencies or public expectations in general with limited resources.

**Topic 4: Public Policy in India: Nehruvian Vision to Modi Era:** This lecture focused on how and what has changed in India in the post – independence era, since the time of Nehru to the present - day Modi era, in the nature and content of Public Policy. While the previous lectures were based generally on the concept of Public Policy, this lecture placed the discussion of Public Policy specifically in the Indian context and was therefore more interesting and engaging for the students.

**Topic 5: Public Policy in India: Role of Interest Groups & Social Movements:** This lecture focused upon the very significant role that interest groups and social movements have had on the process of Public Policy formulation in India. Examples were given of interest groups like Greenpeace International and of the Narmada Bachao Andolan to elucidate to students how non- political actors (groups) play a very important role in the Public Policies that a government can formulate or adopt.

**Topic 6: Budget & Public Policy in India: Recent Trends with special reference to New Economic Policy:** It is undeniable that no matter how good the intentions of a government are, it cannot adopt Public Policies that it cannot afford. Hence, in this lecture, students were given a basic idea about Budget and then the linkage between budget, budgetary allocations, ideology of the governments were established and explained to students.

**Topic 7: Impact of Digitalization on Public Policy in India:** The thrust on building Digital India in recent times as well as the global popularity of e- governance necessitated the delivery of this lecture. While digitalization of public amenities, services, information and data are the demand of the present time, it has its limitations in the form of threat of cyber attacks and other digital vulnerabilities. This lecture helped students understand both the advantages and disadvantages of digitalization and its impact on Public Policy, in the Indian context.

**Topic 8: Populist Public Policies in India: Recent Trends & Impact on Voting Behaviour:** In this lecture, the concept of Populism and the trend of rise of Populist Politics was explained to students first. Then, the lecture delved on how governments across the world as well as governments in India, at both the central and the state levels, are literally playing to the gallery, by framing and adopting Public Policies that are beneficial to create and retain their vote banks, sometimes, even at the cost of incurring heavy public debts.

**Topic 9: Public Policy: Design & Implementation:** In this lecture the different stages followed in the process of 'designing' a Public Policy and in implementing it were discussed in detail. Students were given a clear and comprehensive understanding of the various agencies and processes that are involved in designing and implementing Public Policies.

**Topic 10: Public Policy: Agencies of Implementation:** This lecture explained to students that there are multiple agencies involved in implementing Public Policies right from the Executive to the Legislature and rarely but surely, the Judiciary.

**Topic 11: Increasing need of "Good" Public Policy for effective and efficient administration in present – day India:** This concluding lecture was a quick recapitulation of the entire course content and ended with emphasizing why 'good' Public Policies are not a luxury but rather a need for a third world country like India where, even seventy - seven years after independence, socio – economic disparities and parochial identities determine access or no access to resources of good life and living.

### **An Overview of the Course Content:**

Folk culture is a glorious tradition of our state. Like many other districts of our state, Jhargram is also famous for its traditions.

Nayagram, an area in Jhargram district, situated near the state of Odisha. We can find various traditions of folk culture in this area. This folk culture is an integral part of the people of this area. In the forest of saal, local people worship goddess like sastidevi, SantaiBuri and god kaluasand, kumarsaheb for almost three hundred years. They have their own distinct rituals and they are not worshipped by Brahmins.

If we focus about the language of the area, We will find that the language is partially different from standard colloquies. The impact of Odiya language is clearly seen.
